6. Set the amount of days which patients will be available for you to pull over into Crystal (*typically set at 5 days*)

Optikam Integration Configuration

USING THE OPTIKAM INTEGRATION IN FRAME ORDERS

- 1. Click on the Patient tab in Crystal and open up to a patient
- 2. Once open to a patient, choose the Prescription Tab
- 3. Click on the Blue button to create a Frame Order
- 4. In the Spectacle Lab Orders window, create a New Order
- 5. Click on the From Optikam button to open the list of available patients from the date range chosen

- 6. In the Optikam Measurement Data window, choose the patient's readings you would like to add to your frame order
- 7. This will import all the patient's readings into the patients lab order inside Crystal
 - a. This will also delete the data from the Optikam Measurement Data list.
