

Vista Eye Care instituted our Clean Practice Protocol last year to ensure patient and staff safety during the COVID-19 Pandemic. We strive to efficiently deliver thorough eye care in a safe environment without sacrificing the goals of our Mission Statement. While the pandemic is thankfully fading, we do require that all patients still agree to our Clean Practice Protocol before entering our facility:

1. Masks are required of all patients, visitors, and staff while in our facility. While everyone at Vista Eye Care looks forward to not wearing masks all day, our practice sees many children who are not able to have been vaccinated. All patients / visitors should wear their own face masks to their exams.
2. For multiple patients getting eye exams together as a family, we will work to complete your exams simultaneously when possible. We won't be able to have more than two patients in the same exam room at the same time.
3. We encourage all our patients to work with our Optical staff for their eyeglass frame selection and lens ordering. Our Optical team will work with you before your exam to help narrow down your selection and save you time in the office.
4. Please call us at (303) 450-2020, or email us at info@vistaeyecareco.com, to discuss any medical insurance or vision plan questions you may have prior to your exam.
5. Please arrive five minutes before your appointment and call or text us to let us know that you are here. Please wait in your vehicle until a technician brings you into the practice.

Thank you for helping us stay safe and productive. We look forward to your eye exam with us!
